J. A. BEXELL, Secretary.
J. L. COBURN, Assistant Secretary.

Logan, Utah, April 28th, 1906.

President W. J. Kerr,
Agricultural College,
Logan, Utah.

Dear Sir:

As there is no poultry department proper in the College, the following inventory should be classed under the head of the Experiment Station. The equipment has been selected with the experimental side foremost in each case and we are very poorly equipped to handle poultry instruction at present. We would need six or eight colony houses, a separate brooder house and duck house and we should have at least one breed of turkeys and a flock of pigeons to do satisfactory work in instruction. We are very poorly equipped regarding charts, models and different apparatus essential to lecture work and such practical work as is offered to students in the plant, interferes materially with the experimental work.

Respectfully yours,

J. Willard Bolte

Poultryman .
